## Bright Futures Previsit Questionnaire
### 6 Month Visit

For us to provide you and your baby with the best possible health care, we would like to know how things are going. Please answer all of the questions. Thank you.

**What would you like to talk about today?**

Do you have any concerns, questions, or problems that you would like to discuss today?

---

We are interested in answering your questions. Please check off the boxes for the topics you would like to discuss the most today.

Does your child have any special health care needs?  

[ ] No  
[ ] Yes, describe:  

---

Have there been any major changes in your family lately?  

[ ] Move  
[ ] Job change  
[ ] Separation  
[ ] Divorce  
[ ] Death in the family  
[ ] Any other changes?
Over the past 2 weeks, how often have you been bothered by any of the following problems?

1. Little interest or pleasure in doing things
   - Not at all
   - Several days
   - More than half the days
   - Nearly every day

2. Feeling down, depressed, or hopeless
   - Not at all
   - Several days
   - More than half the days
   - Nearly every day

Does your child live with anyone who uses tobacco or spend time in any place where people smoke?  No  Yes

### Your Growing and Developing Baby

Do you have specific concerns about your baby’s learning, development, or behavior?  No  Yes, describe:

---

Check off each of the tasks that your baby is able to do.

- Rolls over
- Sits briefly, leans forward
- Likes to play with you
- Baubbles and tries to “talk” to you
- Likes to look around
- Begins name recognition
- Smiles at people he knows
- Puts things in her mouth

---

WELL CHILD/6 months
Feeding Your Baby
- Most babies have doubled their birth weight.
- Your baby’s growth will slow down.
- If you are still breastfeeding, that’s great! Continue as long as you both like.
- If you are formula feeding, use an iron-fortified formula.
- You may begin to feed your baby solid food when your baby is ready.
- Some of the signs your baby is ready for solids:
  - Opens mouth for the spoon.
  - Sits with support.
  - Good head and neck control.
  - Interest in foods you eat.

Starting New Foods
- Introduce new foods one at a time.
- Iron-fortified cereal.
- Good sources of iron include red meat.
- Introduce fruits and vegetables after your baby eats iron-fortified cereal or pureed meats well.
- Offer 1–2 tablespoons of solid food 2–3 times per day.
- Avoid feeding your baby too much by following the baby’s signs of fullness.
- Leaning back.
- Turning away.
- Do not force your baby to eat or finish foods.
- It may take 10–15 times of giving your baby a food to try before she will like it.
- The only foods to be avoided are raw honey or chunks of food that could cause choking. Newer data suggest that the early introduction of all foods may actually prevent individual food allergies.
- To prevent choking:
  - Only give your baby very soft, small bites of finger foods.
  - Keep small objects and plastic bags away from your baby.

How Your Family Is Doing
- Call on others for help.
- Encourage your partner to help care for your baby.
- Ask us about helpful resources if you are alone.
- Invite friends over or join a parent group.

Choose a mature, trained, and responsible babysitter or caregiver.
- You can talk with us about your child care choices.

Healthy Teeth
- Many babies begin to cut teeth.
- Clean gums and teeth (as soon as you see the first tooth) 2 times per day with a soft cloth or soft toothbrush with a small smear of fluoride toothpaste (the size of a grain of rice).
- Do not give a bottle in bed.
- Do not prop the bottle.
- Have regular times for your baby to eat.
- Do not let him eat all day.

Your Baby’s Development
- Place your baby so she is sitting up and can look around.
- Talk with your baby by copying the sounds your baby makes.
- Look at and read books together.
- Play games such as peekaboo, patty-cake, and so on.
- Offer active play with mirrors, floor gyms, and colorful toys to hold.
- If your baby is fussy, give her safe toys to hold and put in her mouth and make sure she is getting regular naps and playtimes.

Crib/Playpen
- Put your baby to sleep on her back.
- In a crib that meets current safety standards, with no drop-side rail and slats no more than 2 ½ inches apart. Find more information on the Consumer Product Safety Commission Web site at www.cpsc.gov.
- If your crib has a drop-side rail, keep it up and locked at all times. Contact the crib company to see if there is a device to keep the drop-side rail from falling down.
- Keep soft objects and loose bedding such as comforters, pillows, bumper pads, and toys out of the crib.
- Lower your baby’s mattress all the way.
- If using a mesh playpen, make sure the openings are less than ¼ inch apart.

Safety
- Use a rear-facing car safety seat in the back seat in all vehicles, even for very short trips.
- Never put your baby in the front seat of a vehicle with a passenger air bag.
- Don’t leave your baby alone in the tub or high places such as changing tables, beds, or sofas.
- While in the kitchen, keep your baby in a high chair or playpen.
- Do not use a baby walker.
- Place gates on stairs.
- Close doors to rooms where your baby could be hurt, like the bathroom.
- Prevent burns by setting your water heater so the temperature at the faucet is 120°F or lower.
- Turn pot handles inward on the stove.
- Do not leave hot irons or hair care products plugged in.
- Never leave your baby alone near water or in bathtub, even in a bath seat or ring.
- Always be close enough to touch your baby.
- Lock up poisons, medicines, and cleaning supplies; call Poison Help if your baby eats them.

What to Expect at Your Baby’s 9 Month Visit
We will talk about
- Disciplining your baby
- Introducing new foods and establishing a routine
- Helping your baby learn
- Car seat safety
- Safety at home
